

Saez Lab is looking for a postdoctoral researcher to join the lab at UC Davis. The lab belongs to both the Neurological Surgery department and the Center for Neuroscience, integrating basic and translational research efforts within UC Davis' vibrant, highly multidisciplinary and collaborative research community. Lab projects focus on the neurobiological basis of human decision-making behavior, using a combination of intracranial recordings in human patients (sEEG/ECOG/DBS), neuroeconomic tasks, lesion studies and computational modeling of behavior. The ideal candidate will have a strong background in *in vivo* electrophysiological recordings and/or decision neuroscience.

Applicants should send their CV, a brief statement of research interests as well as the names of two referees to isaez@ucdavis.edu. Informal inquiries about the position are welcome. The position is available immediately, and will be open until fulfilled.
