

**Assistant Professor in the University Tenure Line
Department of Neurobiology at Stanford University School of Medicine**

We are interested in candidates who have a doctoral degree in neuroscience, genetics, biochemistry, biophysics, bioengineering, cell biology or any related discipline and we encourage applications from physician-scientists. Individuals studying a broad range of problems in the nervous system at the molecular, cellular and circuit level are encouraged to apply. We expect the successful candidate to develop an outstanding neuroscience research program and contribute to the education and mentoring of the next generation of scientists.

The predominant criterion for appointment in the University Tenure Line is a major commitment to research and teaching. Their accomplishments during graduate and postgraduate training should already have stamped them as creative and promising investigators. If these individuals have not had formal teaching experience, they should have demonstrated during their academic training a commitment to develop the skills necessary for first-rate teaching. In short, the successful candidate must have demonstrated true distinction (or the promise of achieving true distinction) in research, and the capability of sustaining first-rate performance (or the promise of this) in teaching, and excellence in patient care (if applicable) appropriate to the programmatic need upon which the appointment is based.

Stanford is an equal employment opportunity and affirmative action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, protected veteran status, or any other characteristic protected by law. Stanford welcomes applications from all who would bring additional dimensions to the University's research, teaching and clinical missions.

Interested candidates should submit a cover letter, curriculum vitae (CV), statement of research accomplishments and plans (3 pages, not including references), teaching and mentoring statement (1 page), 2 publications (or pre-prints) highlighting their research accomplishments, and letters from 3 referees. All materials should be submitted online at <https://apply.interfolio.com/67565>. The search committee will begin reviewing applications on November 1, 2019 and will continue to accept applications until the position is filled.
