

Computational Neuroscience Research Scientist Position

The **Toronto Western Research Institute of the University Health Network** invites applicants to apply for a Scientist position in the area of Computational Neuroscience.

The ideal candidate will have a PhD in a relevant field, have research experience and expertise in mathematical and computational modeling techniques, and research interests that complement those of the Institute in “Degenerative Disorders of Aging”. Candidates whose research interests encompass modeling at multiple levels (molecular, cellular, network, systems), and who have experimental and/or collaborative experimental experience are especially encouraged.

The successful candidate will have the ability to establish an independent, well-funded program and will be eligible for appointment at the appropriate level within the University of Toronto.

Applications must be emailed by October 19, 2014 and should include:

- 1) CV,
- 2) Statement of research interests, and
- 3) Contact information (including email) for three referees

Reply, by email only, and in confidence to:

TWRRecruitment@uhnresearch.ca with subject line: CompNeuro

University Health Network thanks all applicants, however, only those selected for an interview will be contacted.
